The Railway from Callao to the Head Waters of the Amazon-Free Cuba a National Sentiment-Naval Mission to Asia-The Coolie Trade Difficulties with Japan and China-American Exploration in Bolivia-Volcanio Eruption-The Coffee Crop.

By steamship from Aspinwall, at this port yesterday, we received special despatches and newspaper mail files from the South and Central American States containing the following late and

PERU.

The Railway from Callao to the Head Waters of The Amazon.

LIMA, Nov. 27, 1872. Referring to the material advancement of this Republic, M. Pardo satisfied himself a few days since as to the rapidity with which the Andes are being conquered by genius and energy. The great railway leading from Callao through the chain of the Cordilleras to the Peruvian head waters of the mighty Amazon, now being constructed by Mr. Henry Meiggs, was made the subject of his personal inspection. Passing through the rich valley of the Rimac, the river upon which Lima is built, the President and his party arrived at the terminus of the works, some eighty-three kilometres from Callao, at a point called Verrugas, where the road, in order to span one of those appalling. gorges which are so frequent in the mountain ranges of Peru, crosses a viaduct, which called into play the utmost resources of engineering skill. This structure is built of iron, constructed in the

United States, and measuring 575 feet from end to end. It is supported by three piers, the highest 252 feet above the foundation of masonry. The viaduet is 1,800 metres above the level of the sea, in the very heart of the Andes. In order to reach this remarkable point the line winds, ascends and returns again to its initial starting place at the base of the chain, over an extended expanse of granite mountain, in one instance, to gain a few feet of elevation, making a retreat, so to call it, of nearly a mile and a half. M. Pardo, his Cabinet, the majority of the mem-

bers of Congress and the diplomatic corps resident in Lima viewed this wonderful achievement of science over the rugged obstacles offered by nature with admiration and surprise. The President, who has travelled much abroad, and to whose efforts, made years ago, the country is now indebted for a means of trame and communication through a rich and virgin territory, expressed his satisfaction at the result attained by Mr. Meiggs in his arduous undertaking. He spoke in the most inspiring man-ner regarding the benefits to be derived by Peru from these arteries, which place the capital and enterprise of the coast in direct contact with the riches and resources of the interior, and signified again his often-declared determination to further the work of internal improvement so ener-getically initiated by his unfortunate predecessor with all the power at his disposal. The Senators and Representatives who accompanied M. Pardo echoed his sentiments, and Mr. John G. Meiggs, who acted as host on the occasion, offered, as a

proof of the earnestness of his brother and himself at the enterprise, the already accomplished facts.

NATIONAL PROGRESS IN GENERAL.

From all quarters of Peru the reports are most gratifying regarding the progress of the many railways now being constructed. The line from Arequipa to Puno, and that from an intermediate point between those two cities to the ancient capital of the laces, Cuzco, will both be completed within a comparatively short space of time.

In the north the Huaraz and Chimbote, the Pacaxmayo and Guadalupe, the Salaverry and Trufilio, and the Huacheo and Salaverry and respectively as wealth, hitherto cabmed and confined by the impossibility of transportation, will cause he to speedily asset.

CURA.

That never-ending question of peace or armistice with Spain is again being energetically discussed by the press and the people. Some weeks since a grand celebration took place at Santlago, in Chile, on the anniversary of the declaration of Cuban independence, and some of the speakers on the occasion, men representing the government and the Legislature, declared that Chile could never accept the terms of the Treaty of Washington until the bombardment of Valparaiso was atomed for and while Cuba was struggling for her place in the family of republics. This declaration was all the more important since by the treaty in question, arranged by the government of the United States between the government of the United States to see interested the could never a clause to the effect that Cuba shall not be assisted with men or material of war during her attempts for freedom by these republics, unless having previously obtained the sanction of the government of the United States to he interested the instrument in question, and in all probability will allow the time spain and her quondam colonies in the Pacific since 1864, will continue at interest of parts with the sanched and t

produce

A consent to a treaty by which the Northern ports of China may be opened to emigration and in return the present system of the coolie traffic will be changed to an arrangement guaranteeing the good at the expiration of their contract time, the expenses of their return voyage to be paid by their employers.

with Japan
THE QUESTION IS MORE SERIOUS.
The action of the authorities at Yokohama and the findings of the Japanese Courts are regarded as without precedent in the history of errors. The assumption of jurisdiction and the consequent liberation of a number of Chinese, who had signed their contracts according to the prescribed laws, and the extraordinary treatment of a vessel seeking shelter and assistance caused a profound sensation in Peru. Captain Garcia will demand explicit explanations and indemnification from the government of the Mikado.
That hostlie measures will be resorted to is not considered probable, but the Presidenthas directed the Peruvian man-of-war Union, now repairing in England, to proceed to China and there join the Independencia. The armament of the Union will be sent to Macao to await her arrival at that port.

Coolie Revolt and Terrible Consequences. (From the South Pacific Times (Calino), Nov. 28.) The Chinese coolies of the hacienda called Herval, in the valley of Canete, have become insubordinate, rising against their overseers, and some lamentable scenes have occurred. It is to be rabid de learner these disorders will again occur at the Coroner

same place if the authorities do not take steps to

CHILE.

Our report from Chile is dated at Valparaiso on the 16th of November, and states as follows:—
A severe shock of earthquake was experienced in this city on the night of the 12th inst., but caused no serious damage.

The approaching elections throughout the Re-

public are anxiously awaited. A bill has passed the Senate permitting the establishment of a new line of telegraph from Cal dera to Lota, connecting with the intermediate ports.
Rich gold mines have been discovered at Lebu

Rich gold mines have been discovered at Lebu, in the south of Chile.

Smailpox continues in Valparaiso.

A new line of steamers, called the Cosmas, is about to be established between Valparaiso and London, touching at the ports called at by the steamers of other companies. The first vessel of the line is now on her way out. This is the third line of steamers between Europe and the west coast, via the Straits of Magelian, which has been established within the past six months.

Work has been commenced on the railroad to connect the mines of Caracolos with the port of Mediliones, on the boundary between Chile and Belivia.

BOLIVIA.

With the exception of the recent threatened imroglio with Chile, Bolivia offers no especial topics of interest.

The government of Colonel Morales appears to be doing all possible toward developing the mineral resources of the country, upon which, indeed, her present prosperity principally depends. The famous silver mines of Caracoles will soon be placed in communication by rail with the port of

placed in communication by rail with the port of Meilliones, an excellent harbor, and the preliminary survey of the proposed line has aircady been made by Mr. John Houston, an engineer of reputation in the United States.

The Minister of Foreign Affairs, Don Casimiro Corral, in his recent report to Congress assures the country that all questions with Chile are in a most favorable way of settlement, and that no fears need be entertained regarding a serious difference of opinion. Mr. Corral takes the opportunity of paying a high compliment to Colonel Leopoid Markbreit, the American Minister in Bolivia, describing him as a gentleman meriting the most distinguished respect and consideration from the Bolivian government and people. Congress, in session at i.a Paz, was to close on the 23d instant, but it was probable that an extra session would be called.

The news from Colonel Church's party was en-

called.

The news from Colonel Church's party was encouraging in the extreme, and the works on his undertaking were advancing rapidly and satisfacto-

dertaking were advancing rapidly and satisfactorily.

The Bolivian army had been proceeding through a series of manœuvring to test the efficiency and discipline of the several corps, and the artillery had given proofs of considerable expertness in their manner of handling the new mitrailleuses, imported from France and Belgium.

ECUADOR.

From the Antes, of Guayaquil, of 23d November,

we take the following:—
On the 1sth of November the first of the dredging On the 18th of November the first of the dredging machines and boats was launched in the river. These dredging boats are intended to clean out and deepen the rivers and inlets which form an extensive network of fluvial communications on the coast of the Republic. The one that is launched is destined for the deepening of the River Milagro. Another dredging launch is being put together and will be ready for service in a few days.

According to the official periodical of Punto the national reuts for the first half of 1872 amount to \$1.887.591 of income and \$1.887.591

SAN SALVADOR,

Volcanie Eruption and Danger to Valuable Crop of Coffee.

The Central American mail, just to hand, informs us of the occurrence of an eruption of the volcano of Santa Ana, in the north of San Salvador. The of salta Ana, in the north of San Salvador. The smoke of it can be seen at sea ascending up from behind the volcano of Izaice, from which Santa Ana is some distance inward.

On the declivities and plains at the foot of this mountain are a great number of coffee plantations which, it is feared, will be destroyed in consequence of this cruption.

The crop of indigo is large and prices rule very low.

Juan L. Bucron, who has contracted for the construction of a railroad from the city of San Salvador to the port of La Libertad, had arrived at the capital with all the necessary material for the undertaking. The work is to be commenced at the town of Santa Tecla on the 8th of this month.

The Constitutional Assembly adjourned on the 9th of November. The Legislature were to meet on the 15th of December.

GUATEMALA.

The coffee crop in Guatemala is expected to turn out well this season. Sales were made at \$10 50, gold, per quintal, delivered in bulk on the hacienda.

COLOMBIA.

The advices from Panama are dated on the 4th

The report says :- The 28th of November, the anniversary of the independence of this Isthmus, was observed with more than usual enthusiasm this year. The celebration commenced on the evening of the 27th uit. and continued till the morning of the 2d inst., during which time every class of business was interrupted.

Political matters on the Isthmus are quiet.

General Niera, the new President, seems to be growing in favor with the people.

COSTA RICA.

In Costa Rica the work on the railroad from San Jose, the capital, to the Atlantic coast is progressing very faverably.

President Guardia is expected to return from Europe in the latter part of December.

CUBA'S STRUGGLE FOR FREEDOM.

The Latest News from the Insurgent Headquarters—Spanish Volunteers De-acrting—General Agramonte at the Head of Twelve Hundred Men Assum-ing the Defensive in Las Villas.

HEADQUARTERS OF LIBERATING ARMY, BARAJAGUA, DISTRICT OF HOLGUIN, Nov. 1, 1872.)
It is currently reported that General Agramonte has marched into Las Villas at the head of 1,200

Official communications have been received here from Camaguey, Las Tunas, Bayamo, Guantanamo and other places, which speak of the great headway the revolution is making, and of the decreasing numbers of the Spaniards.

A reaction in our favor has lately taken place at

Guisa, and seventy men, who had been well armed by the Spaniards, came over to our side.

A conspiracy also broke out among the Spanish volunteers, headed by Captain Diego Jacinte Fon-

volunteers, headed by Captain Diego Jacinto Fonseca, who proposed to come over with his men to and the patriots, but it was discovered, and several men were shot.

In the meantime the Governor of Bayamo, hearing of the disaffection, came on with reinforcements and disarmed the remaining volunteers, in whose fidelity he had lost confidence. A few days after this had transpired a body of our guerillas entered into Guisa, having heard that many of the men who had joined the conspiracy were in prison. After making a simulated attack and creating an alarm in the town, many of the prisoners were enabled to escape during the confusion, and enlisted in our ranks. Twelve miles of telegraph wires have been destroyed by us on the high road between Jignani and Bayamo.

BARTOLO MASO,

Commander of Military Operations.

ATTEMPTED SUICIDE.

Adah Meyers, of 93 Fourth street, attempted to Adah Meyers, 6193 Fourth street, attempted to commit suicide yesterday by shooting herself through the head with a pistol. She was sent to the Fifteenth precinct station house, where the ball was extracted by Dr. Steele, and she was then conveyed to Beilevue Hospital. The wound is not considered a dangerous one. Excessive drinking and despondency are supposed to have been the causes of her conduct.

DEATH FROM HYDROPHOBIA.

John Honoold, a man twenty-five years of age, died on Saturday night in a shanty in Sixty-second street, between Eighth and Ninth avenues, from hydrophobia, after four days' sickness and the most excruciating agony. Some eighteen months ago deceased was bitten in the left cheek by a rabid dog, but the wound long since healed up. Coroner Schirmer was notified to hold an inquest.

JAPAN.

Royalist Relations in the Loochooan-Formosan Imbroglio.

tion to the Loochoo Commissioners-Charges of Fraud in the Commercial Community-Project of a Popular Parliament-American Exertion on the Turf-Social Reform and Public Education-Local Female Slavery of Body, Mind and Soul-An American Appointed Commissioner of Schools.

Diplomacy Towards China-Imperial Consola-

YOKOHAMA, Nov. 6, 1872. There has been nothing definitely settled in the matter between the Loochooans and Formosans. Most probably China will be consulted before anything is done. On the 24th uit, the three Loochoo Commissioners had an audience of the Mikado. They were told that their case is under the consideration of the government, and that Japan will amply avenge them. But they must have a little patience. They were then presented with \$30,000—new paper money—for their local government, and \$200 in coin for each of themselves, be-sides pieces of cloth. The Prince of the Islands was also presented, through the Ambassadors, with sundry pieces of cloth, velvet and some hunting spears.

Twenty-seven Japanese merchants who trade in slik worm eggs are under arrest in Jeddo for fraud. They had some 30,000 cards stamped for "white annuals," the most expensive egg, and placed there-on "Bivoltini" eggs, the cheapest. Two Japanese officials have also been arrested, charged with being privy to the fraud. It is feared that several thousand of these fraudulently stamped cards have already been sold and exported. INDUSTRY AND ART.

Japan is to be well represented in the Vienna Exposition of 1873. Commissioners who were appointed a year ago have been busy collecting samples of vegetable and mineral productions and articles of native manufacture. Arisagawa-No-Miaya, the uncle of the Mikado, now in Europe, is to be the Chief Commissioner representing Japan in Vienna. Two other high officers, Sawa and Okuma, have been appointed to serve under him. THE EMBASSY IN ENGLAND.

Terastima Toza, lately appointed Japanese Ambassador to the Court of Great Britain, is to be relieved on account of ill health. His successor has not yet been named. Motono, late Superintendent of Customs at this port, has been appointed Secretary of Legation at London.

POPULAR RIGHTS AND A PARLIAMENT.

A Japanese paper published in Jedde informs us that Japan is to be biessed with an elective Parliament. Next month there are to be 600 members elected. What particular powers they are to possess and for what term they are to be elected we are not informed. A nominal Parliament has been Court to Jeddo. But this body, as far as could be ascertained, had no legislative power, nor was its members selected by any particular rule. At any rate it has had no influence upon affairs of State. An elective Parliament in Japan would be a grand

AMERICAN TURFMEN ON THE SOD. The fall meeting of the Yokohama Race Club was held on the 30th and 31st of October and the 1st of November. The meeting was well attended, but the racing was exceedingly tame. The American community was represented by one stable only, that of the United States Consul. He was lucky enough to carry off two prizes on the last day-

community was represented by one stable only that of the United States Consul. He was lucky enough to carry off two prizes on the last day—namely, the Solace Cup, value \$100, for all beaten ponies of the meeting, and the Members' Cup, value \$50, owners up.

SOLIAL PROGRESS.

A few days ago the Japanese in the native town of Yokohama were made happy by the sight of gas burning for the first time. The gas company is purely a Japanese one, and the mains are laid in the native portion of the town only. They will, however, eventually be extended to the foreign settlement.

SLAVERY OF BODY AND SOUL.

The Japanese government has recently instituted a vast social reform, one that cannot but elevate them in the opinion of all foreign nations. Hitherto the "social evil" has existed in Japan in rank inxuriousness, and perhaps it was the only country in the world where it was not only protected but actually iostered by the government. In all large cities a certain portion of the town was set aside for this purpose, called the Yoshiwarra. The people who kept the houses were absolute masters of the bodies of the poor inmates, who had been purchased when very young, for terms of years varying from one year to the term of a natural life. These poor girls were absolute siaves. They were not allowed to leave the precincts of the section of the town, and were liable to be beaten, starved or otherwise maltreated at the will of their owners. The latter were protected by the government in return for a per capita tax, which was levied monthly, and a more disgusting condition of slavery never existed anywhere.

When the Japanese government evinced such a laudable amount of sympathy for the Chinese coolles on the Maria Luz, the counsel for the captain of the ship very forcibly drew the attention of the Japanese officials to the terrible nuisance that existed under their very noses, It has evidently produced an effect.

A RECENT EDICT

annuls all contracts of the brothels were brought to the municipal office and informed that they were

universal evisions to entoroughly controlled in Japan to prevent disease and the spread of immorality.

Public Education.

From a circular recently issued by the Education Department i see that the whole system of education in Japan is to be remodelled. The whole of the Empire is to be divided into eight grand school districts, in each of which is to be one university, four first class academies or high schools, twenty-six grammar schools and a large number of common schools. In the universities and high schools pupils are to pay \$7.50 per annum for education, in the lower schools \$5. From the universities thirty students are to be selected annually to be sent abroad to pursue professional studies, and will receive \$1,800 per year from the government. From the middle schools 150 will be sent abroad annually and receive \$1,009 per annum for their support from the government—another 150 will receive scholarships and will be assigned to utorships in the different schools. In the common schools forcign languages will not be taught; but the students of the higher schools can elect to study any three loreign languages they deem fit.

PROFESSIG 6. D. NORTHRUP,

now State Superintendent of Public Schools in Connecticut, has been selected to fill the post of Superintendent of Public Instruction here. It is an important office, and his selection is highly flattering to himself, and is quite a compliment to the American system of education.

A 771 SIXTH AVENUE, BETWEEN WASHINGTON A and Waverley places—Ladies and gentlemen will be astonished at the prices given for Cast-off Clothing, Carachets and Jewelry. Never before have such high prices been paid, as we are bound to fill an order, and goods must be had. For Coats, from \$3 to \$2; Pants, \$2 to \$19; Dresses, \$5 to \$70. Please call or address as above. Ladies attended by Mrs. Harris.

OLYMPIC THEATRE.

And LA BELLE HPLENE.

OPTINIONS OF THE PRESS.

The Tribune:—"La Belle Helene" has been ably presented at the Olympic Theatre, and certain of its rollicking melodies have been heard with critical satisfaction, and her bold beauty befts the late Helen of burlessue. Mile. Almee is entirely successful. * Her animal spirits, drollery and mischief give zest to the personalion. animal spirits, drollery and mischer give zest to the personation.

The World—The deliciously wicked "Belle Helene" the World—The deliciously wicked "Belle Helene" as given last evening at the Olympic Theatre. It could not be much more deliciously done anywhere than this company have played; tall this week. Mile, Aimee out of the second of the second deliciously done anywhere than this company have played; tall this week. Mile, Aimee out of the second deliciously done anywhere the country of the second deliciously de
